

MYTOBI NATURA™ is a blend of hepato-protective, liver cell rejuvenating, nephro-protective, antifungal, antibacterial and anti-oxidant phyto-chemical extracts. Enriched with mannan oligosaccharides and vitamins.

Benefits:

- MYTOBINATURA Controls mycotoxins and reduces morbidity and early mortality in birds.
- Biotransformation of the toxins through Mannan Oligosaccharides
- Protects the liver, kidney and improves their health condition, feed conversion ratio.
- Does not interfere with any medication or coccidiostats
- Better response during vaccination programmes
- Enhances cellular and humoral immunity, improves growth, body weight and egg production.

Recommendations:

- Control and reduce feed contaminations.
- Improves liver, kidney health and binds multiple mycotoxins.
- Inhibits growth of mold and prevents further mycotoxin production.
- Increases immunity and reduce stress on liver.
- Improves laying performance and growth in birds

Recommended Usage:

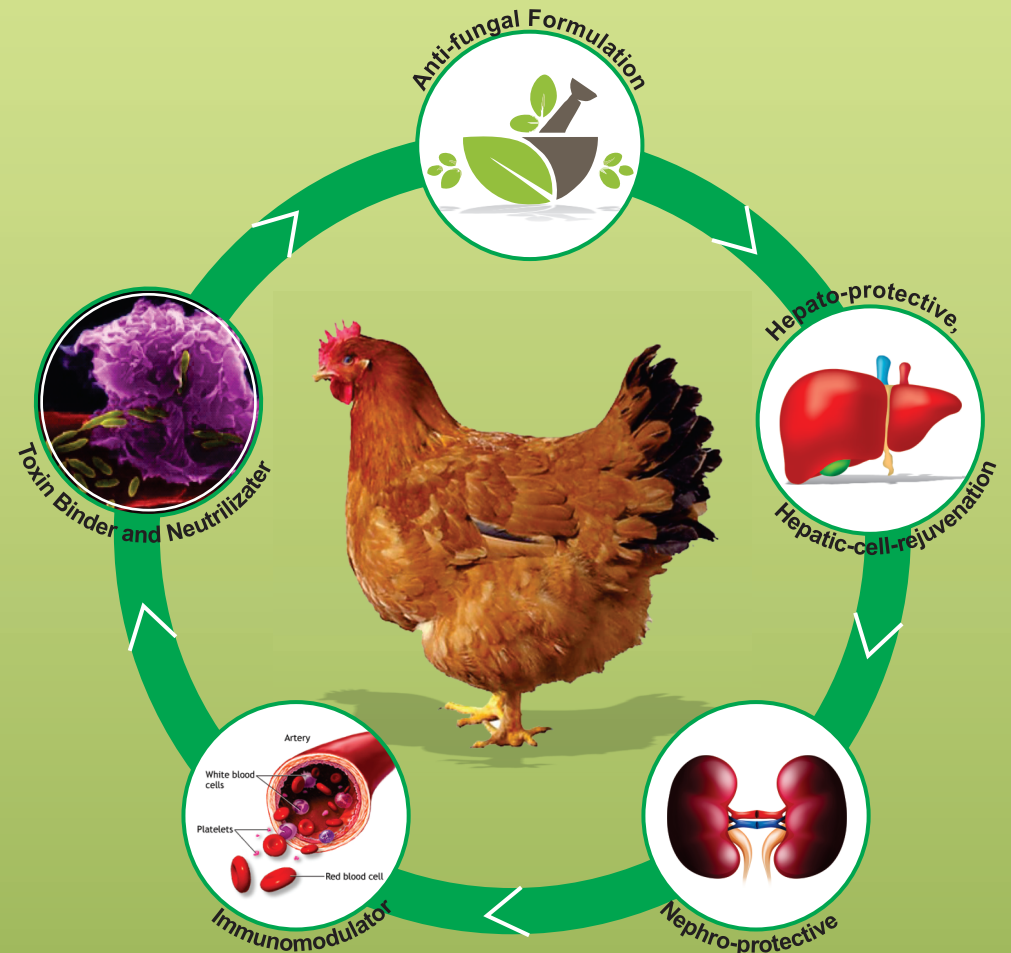

0.25 to 0.5 ml of MYTOBINATURA per ltr. of drinking water for 5 to 7 days

During Stress- 0.5 to 1 ml per ltr. of drinking water for 5 to 7 days

Packaging:
100 ml, 500 ml
& 1 Ltr.

Mycotoxin problems require a multifaceted solution

Introducing
1st Time in India

Composition:

Each liter Contains:

Phytochemical extracts from blend of *Andrographis paniculata*, *Eclipta alba*, *Terminalia chebula*, and *Gmelina arborea*.....1200 g
Thiamine Mononitrate.....150 mg
Pyridoxine Hydrochloride.....150 mg
Cyanocobalamin1500 mcg
Copper Glycinate.....1.25 gm
Mannan oligosaccharide Complex.....20 gm

TOXIN BINDER AND NEUTRALIZERS

(*Andrographis paniculata*, *Eclipta alba*, *Terminalia chebula*, *Gmelina arborea*,):

Improves blood flow in the mucous membrane of gastrointestinal tract, reduces intestinal disease, amprolium toxicity, or mycotoxins and Improves growth performance.

01

STRESS BUSTER

(Copper glycinate, Mannan oligosaccharide):

Improves the absorption and utilization of small molecules related to the synthesis of antioxidants. Decrease malondialdehyde (MDA) concentration in eggs and liver, oxidative stress and increase superoxide dismutase (SOD) activity in the liver.

06

HEPATO PROTECTIVE AND HEPATIC CELL REJUVENATOR (*Andrographis paniculata*, *Terminalia chebula*, *Gmelina arborea*, *Eclipta alba*, *Thiamine mononitrate*, *Pyridoxine hydrochloride*, *Cyanocobalamin*, *Mannan oligosaccharide*):

Increases appetite, metabolic activities, feed conversion ratio and liver function. It enhances growth performance, good feathering, erythrocytes production and nervous system.

02

NEPHRO-PROTECTIVE AND ANTI-OXIDANT (*Gmelina arborea*):

Phytochemical extracts support kidney health by promoting urine production, protecting kidney cells from damage and reducing inflammation. Their antioxidant properties help to reduce oxidative stress, contributing to overall kidney wellness and efficient detoxification.

03

IMMUNOMODULATOR

(Copper glycinate, Mannan oligosaccharide):

stimulates to intestinal cells in the jejunum and ileum to secrete more immunoglobulins. Immunoglobins protects and improves homeostatic regulation of intestinal mucosal epithelia, improves immune system.

04

ANTIMICROBIAL (*Andrographis paniculata*, *Copper glycinate*, *Mannan oligosaccharide*):

Reduces microbes in the gastrointestinal tract by influencing the environment of the intestinal tract thereby improves feed efficiency, growth rate, gut integrity and health.

05

Friendly to Liver & Kidney - Foe to Mycotoxins
